EDUCATION

Arizona State University <i>Master of Science in Software Engineering</i>	Jan 2020 – Dec 2021 4.0 GPA
---	--------------------------------

INTERNSHIPS

Software Engineer Intern <i>Cloudchip Technologies</i> <ul style="list-style-type: none">Developed web services and REST APIs for the spring boot backend systemWorked on a new registration service, which resulted in the addition of 10 users per dayWorked on various tasks such as creating endpoints, services, and DAOs	Oct 2018 – Apr 2019 India
--	------------------------------

PROJECTS

Dclassifieds <i>Sprint Boot, React.js, Material-UI, MySQL, Docker</i> <ul style="list-style-type: none">A full-stack web application for viewing and posting classified advertisements. Developed with Spring Boot serving REST APIs and React.js as the frontendImplemented JWT authentication for user authentication and authorizationUsed Hibernate/JPA for ORM and to persist user data in MySQL database. Used Cloudinary service for storing advertisement images	May 2020 - Aug 2020
AR Campus Tour App <i>Unity Engine, Mapbox, Firebase, Git, C#</i> <ul style="list-style-type: none">Developed an android application for scheduling, and searching, navigating, and touring places on ASU CampusImplemented real-time AR navigation and map navigation using ARCore and Mapbox SDKs for UnityWorked with a team of six following Agile/Scrum methodologies	Aug 2020 - Nov 2020
PyPro <i>Python, SWI-Prolog</i> <ul style="list-style-type: none">Created a programming language inspired by PythonUsed Python for lexical analysis and SWI-Prolog for parsing phase and managing environment tablesWorked with a team of four and collaborated via Git and Github	Feb 2020 - Apr 2020
Warframe Bot <i>Node.js, Express.js, Dialogflow, Git</i> <ul style="list-style-type: none">Developed a Google Assistant chatbot to get information and in-game status for the Warframe gameCreated web services and REST APIs using Node.js and Express.js to integrate with google APIs for serving JSON dataUsed Dialogflow for natural language recognition and deployed to Heroku	Aug 2019 - Oct 2019
Semantic Web Application <i>Spring Boot, React.js, React-Bootstrap, AWS, Apache Jena</i> <ul style="list-style-type: none">A web application that leverages the power of linked open data and the semantic webDeveloped UI using React, and React-Bootstrap. Created REST APIs on Spring and integrated with Apache Jena for query processingCreated SPARQL queries to collect the data from the web and process over 50000 instances to achieve accurate results	Nov 2020 - Dec 2020
Todo Web App <i>React.js, Material-UI</i> <ul style="list-style-type: none">A single page application to create and manage Todo lists. Developed using React.jsUsed components from Material-UI framework for React to maintain material design	Oct 2020 - Oct 2020
HACS <i>Java, Design Patterns</i> <ul style="list-style-type: none">A Homework and assignment management system. Developed using Java swingIncorporated various design patterns such as Facade, Visitor, Bridge, etc., while designing the system	Apr 2020 - May 2020

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS
Frameworks: Spring Boot, Node.js, Express.js, Material-UI, React Bootstrap
Libraries: React, Bootstrap
Developer Tools: Git, Docker, AWS
